

Felix Moronge

267-468-9116 | New York, NY | felixmftc@icloud.com | [linkedin.com/in/felixmoronge](https://www.linkedin.com/in/felixmoronge) | github.com/NeverEverFelix

EDUCATION

Temple University

Bachelor of Arts in Computer Science

Philadelphia, PA

May 2025

EXPERIENCE

Software Engineer (Contract)

Feb 2025 – Present

Waveform

Remote

- Developed full-stack web application using JavaScript/HTML/CSS, Node.js, and PostgreSQL, delivering personalized resume feedback to beta users
- Implemented a retrieval-augmented backend service that ingests resumes and retrieves relevant context to improve feedback quality, deployed as a containerized application on AWS
- Automated unit testing and deployment using GitHub Actions CI/CD pipeline
- Engineered internal tooling and reliability mechanisms (retry, timeout, fallback) to reduce user-facing errors and improve system stability
- Implemented JWT-based authentication and authorization in a TypeScript REST API

Technical Support Specialist

June 2023 – Aug 2025

Temple University Fox School of Business

Philadelphia, PA

- Collaborated with IT department to provision and maintain faculty hardware, software, and technology
- Resolved authentication and account issues by diagnosing Active Directory credential failures and restoring user access
- Responded to on-call incidents, performing live triage and documenting fixes in Jira, Helix, and ServiceNow

Administrative Intern

Jan 2022 – Aug 2022

TUHS Department of Surgery

Philadelphia, PA

- Partnered with chief medical staff to identify and design technical solutions to improve tele-medicine attendance
- Coordinated patient outreach and appointment confirmations between clinical teams and patients, reducing physician workload by 20%
- Automated the outreach and confirmation process, increasing patient appointment attendance by 35%

PROJECTS

Artificial Intelligence Reliability Library | Open-Source NPM Package | *TypeScript*

Oct 2025 – Present

- Built a TypeScript library providing retry, timeout, and fallback utilities to improve reliability for LLM workflows
- Validated engine and workflow behavior through unit testing
- Published library to npm — [npmjs.com/package/fabricks-ai-reliability-layer](https://www.npmjs.com/package/fabricks-ai-reliability-layer)
- Demo: fabricks-demo-ad40b01e8026.herokuapp.com

Personal Blog Site | felixmoronge.com | *TypeScript, React, AWS, Kubernetes, Terraform*

Mar 2025 – Jul 2025

- Deployed Kubernetes on AWS EKS using Terraform and Helm, automating builds and eliminating manual setup
- Engineered a CI/CD pipeline with Jenkins, reducing build times from 45 minutes to 2 minutes and enabling automated rollback
- Documented infrastructure design as a public case study

RAG Chatbot | felixmoronge.com | *Python, Go, FastAPI*

Apr 2025 – Jul 2025

- Engineered Go + Python FastAPI RAG microservice to enable content-based information search
- Integrated pgvector database (PostgreSQL) with OpenAI API to retrieve relevant document context and generate AI-powered responses

Fabricks LLC | Fabrics iOS App

Nov 2024 – Present

- Led the conception, design, and delivery of Fabrics, a social fashion discovery platform on the iOS App Store

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, Go, PostgreSQL, HTML/CSS

Frameworks: React, Node.js, Vitest, FastAPI, Express

Developer Tools: Git, Docker, Kubernetes, Terraform, Helm, Jenkins, CI/CD, GitHub Actions
